## (54) CONTROLLER

### (57)Abstract:

**PURPOSE:** To prevent the occurrence of the states that are inconvenient to the users by notifying the drop of the battery voltage to a center.

**CONSTITUTION:** When the voltage of a battery 8 drops, this drop is detected by a voltage drop detection part 9 and a drop decision signal is sent to a notification request part 10. The part 10 gives a notification request to a central control part 7. The part 7 receives the request and notifies the information on the drop or voltage of the battery 8. If the voltage of the battery 8 drops further, this drop is detected by a 2nd voltage drop detection part 14 and a drop decision signal is sent to an operation stop request part 15. Thus the part 15 gives an operation stop request to the part 7. Thereafter the part 7 stops its notifying operations.

## LEGAL STATUS

[Date of request for examination]

22.06.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3458459

[Date of registration] 08.08.2003

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
